Data Sheet HD-PAC2102

### Features:

- Disc shaped thin profile
- Fast response
- Strong Haptic feedback

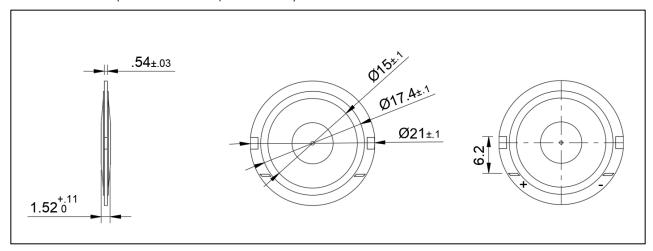

# Design:

- RoHS/REACH exempt PZT ceramics
- Actuator dimensions: 21ø x 1.52 (mm)
- Emphasized displacement using titanium cymbals

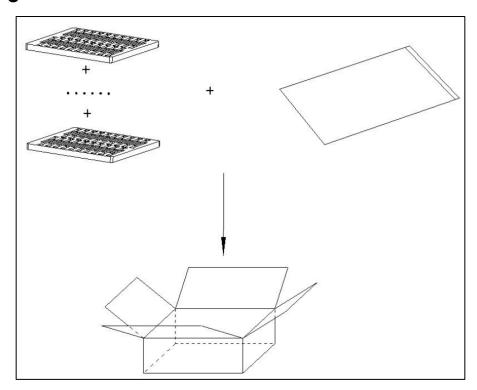

**Specifications** 

Parameters	Values	Units
Maximum Input Voltage	120	V <sub>P-P</sub> - 15ms max
Working Voltage Range	-30 ~ +90	-V <sub>P</sub> ~ +V <sub>P</sub>
Resonant Frequency	14 ± 1	kHz
Nominal Displacement	50 ± 10%	µM (@ -Vp ~ +Vp)
Capacitance	400 ± 20%	nF (@1V, 1kHz)
Metal Plate Material	Titanium	-
Soldering Methods	Hand Solder; Low Melting Solder	-
Environmental Compliances	RohS/Reach	Exempt 7c-1
Weight	1.6	Grams
Storage Temperature	-40 to +70	°C
Operating Temperature	-25 to +60	°C
Operating Humidity	< 75%	Relative Humidity

# **Dimensions** (Units: mm; Polarity: As Marked)

# **Packaging**

Pieces / Carton	Packaging Tray	External Box	Gross Weight	Net Weight
	(cm)	(size) (cm)	(kg)	(kg)
800	34 x 25	38 x 22 x 14	3.7	1.45

## **Precautions**

### Operation:

- 1) Piezoelectric components may generate an impulse voltage when subjected to mechanical or thermal shock.
- 2) During the installation of piezoelectric components, the use of sulfur or sulfide should be avoided as much as possible, which may cause product failure due to corrosion of the surface of the ceramic.
- 3) During the use of piezoelectric components, it is necessary to avoid loading a DC bias voltage exceeding 0.3v (the loading direction should be consistent with the polarization direction, and the time should not exceed 168h) to avoid failure.
- 4) It is recommended to close the piezoelectric components through CRC to protect the sensor during use.
- 5) Piezoelectric components are not moisture absorbing components, and the humidity sensitivity level is Level 1.
- 6) Pb in piezoelectric ceramics is exempt from RoHS within clause 7 (c) 1.
- 7) Piezoelectric components cannot be repaired during post processing.

### Storage:

- 1) Piezoelectric components should be avoided from being used or stored in corrosive gases such as chlorine, sulfur, acid, and alkaline gases. When storing at room temperature and normal humidity, try to avoid direct sunlight and sudden changes in temperature and humidity, which may cause sensor failure.
- 2) The storage of piezoelectric components should be avoided as much as possible under conditions of severe dust and high humidity.
- 3) The recommended storage temperature for the piezoelectric components is 25±5°C, humidity is 25-65%RH.
- 4) It is recommended to use the piezoelectric components within 7 days after opening the package. If they are not used up, it is necessary to replace the desiccant in the packaging tray and vacuumize the packaging.

## Transportation:

- 1) During transportation, piezoelectric components should be protected from sunlight and damp environments.
- 2) Avoid strong impact and vibration on the product during transportation.

#### **Specifications Revisions**

Revision	Description	
Α	RELEASED FROM ENGINEERING	4/30/2023

#### Note:

- 1. Unless otherwise specified:
  - A. All dimensions are in millimeters.
  - B. Default tolerances are  $\pm 0.5$ mm and angles are  $\pm 3^{\circ}$ .
- 2. Specifications subject to change or withdrawal without notice.
- 3. Environmental Compliances: RoHS/REACH Exempt 7c-1
