#### Data Sheet

#### POM-2739L-HD3-LW100-R

PUI Audio's all-new **HD Series** microphones use premium-grade MOSFETs and diaphragms for high sensitivity and superior signal-to-noise ratio. The **HD3** microphones incorporate a three-pin design (drain, source and ground) to reduce self-noise.

Each microphone features GSM buzz-blocking capacitors. Upgrade the ECM microphone that you use today with a PUI Audio **HD Series** microphone.

The 6mm diameter **POM-2739L-HD3-LW100-R** is an omni-directional microphone designed for extreme fidelity and focused recording of acoustic sources on and off-axis from the microphone.

#### **Features:**

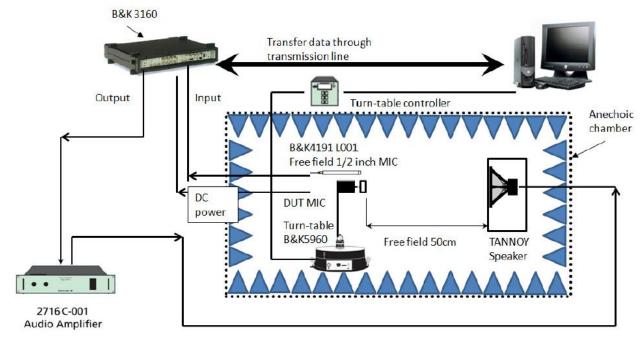

- Convenient 100mm lead wires for quick electrical connection
- -39 dB sensitivity
- 73 dB signal-to-noise ratio
- Omni-directional pickup pattern
- Exceptional 130 dB acoustic overload point (AOP)

#### **Microphone Handling Precautions**

High temperature and/or static electricity may damage microphones. To ensure careful handling, we suggest following these precautions:

- Ensure the power rating of the soldering iron is below 90 watts
- The temperature of the soldering iron must be limited to 360°C ±10°C (680°F ±50°F)
- Soldering duration for each terminal shall be at or under 2 seconds
- Avoid the rear sound holes when soldering
- If practical, use a metal fixture to hold the microphone in-place and to act as a heatsink. A fixture should have appropriate diameter holes drilled through the entire fixture to prevent pressure from being placed on the diaphragm (as below)
